

# Early Dispute Detection & Chargeback Management Tool

Generated: 2026-07-01

## What This Tool Does

- Detects dispute signals before formal chargeback filing.
- Scores transactions based on risk factors.

## Core System Components

- Data generation layer: structured chargeback records with reason-code fields.
- Detection engine: analyzes transaction patterns for anomalies.

## Function Overview (Scripts)

- generate\_chargeback\_dataset.py: creates normalized sample case data for reporting and QA.
- early\_dispute\_detector.py: implements the core detection logic.

# Early Dispute Detection & Chargeback Management Tool

Dashboard Highlights

## Dispute vs Chargeback Lifecycle

- Dispute stage: customer or merchant can initiate, negotiate with notes/evidence/amount, and track accept/reject outcomes.

- Chargeback

## Risk and Detection Logic

- Risk tiers: Critical, High, Medium, Low.

- Signal

## Dashboards and User Views

- Customer Resolution Center: active chat, evidence prompts, and settlement response.

- Merchant

# Early Dispute Detection & Chargeback Management Tool

Dashboard Highlights

## Workflow Interpretation

- Input context is captured from customer-support conversations and evidence artifacts.

- Signal

## Outputs and Deliverables

- Excel dataset for case operations and audits.

- Interac

## Intervention Workflow

- Request evidence.

- Escala

# Early Dispute Detection & Chargeback Management Tool

Dashboard Highlights

## Business Value

- Lower chargeback losses via earlier detection.
- Faster dispute resolution

## Next Steps

- Add production reason-code policy mappings.
- Integrate with external dispute management tools

### Merchant Admin Dashboard

- Merchant risk drilldown, case workflow controls, evidence readiness actions, and issuer outcome tracking.

### Merchant Risk & Operations Dashboard

Focused drilldown for the selected merchant, with unresolved case workflow, evidence actions, issuer simulation, and marketplace case creation support.

No active dispute cases were found for **Unknown Merchant**. Use the Admin Dashboard to navigate to another merchant.

### Cases & Resolutions

Track dispute status and manage case resolutions. Click case ID to view chargeback lifecycle and outcome details.

+ Simulate Case

⚙️ Simulate Status Change...

Open Cases

Resolved Cases

| <input type="checkbox"/> | Case ID | Amount | Reason Code | Initiated | Risk | Status | Days | Amount Due/Owed | Fee | Payout |
|--------------------------|---------|--------|-------------|-----------|------|--------|------|-----------------|-----|--------|
|--------------------------|---------|--------|-------------|-----------|------|--------|------|-----------------|-----|--------|

### Evidence Documents

Manage and submit evidence documents to support dispute defense. Merchants can upload, review, and submit documents directly to the issuer.

**Document Types Accepted:** Transaction records, delivery proof, authorization logs, customer communications, merchant policies, payment receipts, shipping evidence, refund records, and fraud investigation reports.

**Add New Evidence Document**

Document Type

Transaction Record

Upload Document

### Recommended Merchant Actions

Step 1: Confirm transaction details, capture payment authorization logs, and flag unusual routing or account changes.

Step 2: Prioritize high/critical cases for immediate evidence collection and escalate cases with issuer requests.

Step 3: Use the simulation tools at the top to practice issuer responses and bulk marketplace case actions.
